GREY BRUCE Health SERVICES
Quality Health Care Right Here

Infection control data is collected and reported on a quarterly basis. The following data covers the time period from April to June 2019, and includes: methicillin-resistant *staphylococcus aureus* (MRSA) bacteremia, vancomycin-resistant enterococci (VRE) bacteremia , central line primary blood stream infection (CLI), ventilator-associated pneumonia (VAP), surgical site infection prevention (SSI) and Clostridium difficile. This data is collected at each of the six Grey Bruce Health Services hospitals, unless marked NA - not applicable.
